

Lelkes, Ildikó

Ministry of Interior, Secretariat of State for Health, Hungary

Dr. Ildikó LELKES is Head of Health Financing and Development Department, Secretariat of State for Health, Ministry of Interior Affairs, Hungary.

She holds an MSc in Business Administration/Finance, a CEMS (Community of European Management Schools) Master's in International Management and is a Juris Doctor.

With more than 15 years' experience in health sector governance, at present she is responsible for national scale projects, policy documents and government proposals in the fields of evidence-based health policy, digital health, technology assessment, health financing, budgeting, health insurance, statistics and health system performance analysis. Recent major initiatives with her key contribution include first general legislation on telemedicine, integrated national program on patient-centred maternity care, introduction of innovative payment techniques and comprehensive revision of DRG based financing.

Ildikó is working closely with international organizations including WHO and OECD. She is delegate of Hungary for OECD Health Committee and Joint Network of Budget and Health Officials as well as member of WHO Strategic Partners' Initiative for Data and Digital Health working group. She has been fulfilling leading roles in designing, managing and implementing several EU Technical Support Instrument projects. She is member of Quality Governance Collaborative Faculty of the Royal College of Physicians of Edinburgh.

She is fluent in Hungarian, English, French, Italian and speaks intermediate Russian.
