

Keiding, Stine

Cultural Region Funen

Since 2019, Stine has organised, financed, and developed Art on Prescription programmes at both regional and international levels, aimed at promoting mental well-being among diverse groups of citizens. She is currently leading the Interreg project [Art on Prescription in the Baltic Sea Region](#) (2023–2025) and possesses a deep understanding of the complexities inherent in cross-sectoral initiatives—particularly the need to accommodate differing logics, priorities, and objectives.

As Programme Manager for Cultural Region Funen—a partnership between nine Danish municipalities that jointly fund long-term cultural and artistic initiatives across municipal boundaries—Stine brings over 15 years of experience in managing multi-year projects involving municipalities, citizens, and professionals from a range of disciplines. Her work focuses on promoting knowledge exchange, co-creation, strategic planning, and policy development, with the overarching aim of enhancing the professional and artistic quality of local cultural initiatives while ensuring they deliver meaningful value to the community.
