80% of participants attend to improve knowledge and understanding of current health policy developments and health initiatives

66% of participants attend to the EHFG for professional networking

73% attended five or more sessions

42% participated for the first time

COLLABORATION

Only through collaboration we can ensure improvement of health and societies.

We really need to move closer together in Europe and collaborate more with each other.

Collaboration is fundamental for building solidarity.

SOLIDARITY

The importance of solidarity and collaboration across all sectors to build more resilient and equitable health systems for the future.

Solidarity for a better health system.

We need to increase solidarity and trust during these challenging times, and keep equity at the forefront of everything we do.

Take-away messages

HEALTH IN EUROPE

That we need more space for reflection and working together with stakeholder groups to direct the future of European health.

Need to continue advocating for public health in the EU arena.

Stronger Europe needs courageous decisions.

The EU has all the infrasture to be a global leader for health.

PUBLIC HEALTH ARENA

Protecting public health is super urgent. It is under threat from various sides, including the institutions that were set up to support it.

The public health community will have to work even harder to keep health, solidarity and health equity high on the political agenda.

Public health is strongest when knowledge, policy, and collaboration across generations and sectors come together.
